

Gemalto SafeNet IDPrime 930 + HID Prox + iClass32k

Also known as SafeNet IDPrime 931, this is a version of the 930 card. It is a plug & play PKI smartcard that provides the necessary security services to implement a strong two-factor logical access and security infrastructure on Windows and other platforms. The IDPrime MD 930 is a contact interface smart card that supports the ISO 7816 standard, and is Common Criteria EAL6+ certified. This SafeNet IDPrime 930 is FIPS 140-2 Level 2 compliant, a natural replacement for the Gemalto ID Prime MD 830 L2 or L3, with enhanced cryptographic support (including RSA up to 4096 bits and elliptic curve algorithms).

Fully compliant with the latest Microsoft minidriver specifications for use on Windows, without the need for additional middleware, the necessary driver will install automatically and for free, using plug-and-play.

This version includes a built-in low frequency HID Prox RFID chip, and a high frequency (13.56MHz) HID iClass 32k chip, providing a useful and flexible combination that can be used for logical and physical access control and other RFID-based applications.

Plain white (HID-branded) card. Includes standard HID Prox and iClass programming - please specify the required format and number range in the special instructions box during the checkout process, or contact us to discuss the options available.

Gemalto (SafeNet) part number O1170975. Gemalto is now part of Thales.

**PKI smartcard ideal for highly secure public-key based applications. Includes built-in contactless HID Prox and iClass 32k chips allowing for the addition of physical access control applications.**
