SafeNet eToken FIDO authenticator

The SafeNet eToken FIDO is a portable two-factor USB authenticator token that supports secure network logon in Windows10 and other FIDO2-compliant operating systems. It can support authentication and digital signing, as well as secure remote access to VPNs, portals and cloud services. The token requires no special reader or training to use. The token can be developed, by the addition of Java applets, to support other security applications.

Fully compliant with the latest Microsoft minidriver specifications for use on Windows, without the need for additional software. These FIDO2 security keys are fully compatible and integrated with Azure AD. They have been verified by Microsoft technical teams. The tokens are Common Criteria certified. FIPS140-2 Level 2 certification is pending.

SafeNet part number 909-000208. Gemalto is now part of Thales.

SafeNet eToken FIDO portable authenticator. Mini format white case and Microsoft-Azure accreditation.
